## National Med Lab Week—April 19th to 23rd

During National Medical Laboratory Professionals Week, we invite you to join in to celebrate the important roles played by our Medical Laboratory Assistants, Technologists, Secretaries, Pathologists, and Managerial staff as they serve the public through defense and discovery. Whether it is a blood test, a throat swab or a biopsy, tests performed by medical laboratory professionals provide vital information about your health. Doctors depend on laboratory test results to accurately diagnose and treat illness, and monitor patient health. **In fact, up to 85 per cent of decisions about diagnosis and treatment are based on laboratory test results.** This week is a time to promote and recognize the professionals who work vigilantly on the front line of the public health system performing tests that provide the results and permit the critically important health care decisions to be made promptly and accurately.
