Another Year of Cancer Care Improvements

The Erie St. Clair Regional Cancer Program has published its *Year in Review* highlighting the progress made on important programs and initiatives in 2011-2012. Some highlights include: an innovative, culturally sensitive program to increase Cancer screening rates among our First Nations communities; a Tool Box for all family doctors that makes it easier for them to promote and track Cancer screening for their patients; life-saving express care for our region's four prevalent Cancers: Breast, Colorectal, Lung and Prostate; a new shared-clinic approach that gives Prostate Cancer patients better information and more treatment options; more Multi-Disciplinary Cancer Conferences bringing together the best clinical minds to discuss the diagnosis and treatment of individual Cancer patients; multiple forums and opportunities to involve patients and families in guiding the development of programs and initiatives; a drastic decrease in wait time for Radiation Treatment – from the worst in Ontario to among the very best.
