*The Standard Unit Project Team continues to spread changes. This week, staff on 7N and 8N at Met campus have begun standardized Care Rounds.*

## *Standard Unit: Moving Forward*

We are pleased to announce that Care Rounds have arrived on 7/8N at the Met Campus this week! With the help of the interdisciplinary team, these boards will allow unit staff to report on barriers to discharge and collaborate on a daily plan of care tailored to support the patient's recovery, as well as timely discharge from hospital.

Patient Summary Tools and Shift to Shift reporting have also launched on 6E and 8W at the Ouellette Campus! The Patient Summary Tool is being updated throughout the patient's stay and is used as a reference sheet during verbal Shift to Shift report. For Shift to Shift report, the nursing staff meet in pre-determined modules and receive report for all patients within their set module, allowing for an increase in collaboration.

Stay tuned for more updates in the weeks to come!

## *It's a Girl !!!*

Congratulations to Dayna on the safe arrival of "Doodlebop"!

Although many predicted a boy, Dayna and her spouse are thrilled to welcome a baby GIRL and have named her Ripley.

As soon as she feels up to it, Dayna informed the team that she'll be stopping by for a friendly visit during one of SOP's Friday Huddles.

*Last week, Dayna [Roberts] Eagen, SOP Coordinator, safely delivered a baby girl. Welcome to motherhood Dayna!*

Have a great weekend!

The SOP Team
