

June 12, 2015

Hello Everyone:

This week's update begins with an introduction. Jeffery Elston is our newest SOP Coordinator, and on the KM&T side of our group we welcome Rachel Twohey to the ranks. With all the work coming along from the transition of the priority projects to the 2nd wave of projects, these new sets of hands will be much appreciated.

This week we held another in our series of clinic sessions with the project leads. This time we talked about the upkeep and use of the PMO documentations. We also reviewed the Plan – Do – Study – Act cycle which is key to this kind of systematic improvement.

Priority Project Update

Our priority projects keep plugging away at the initiatives that they started back in November. In MRI we continue our implementation of the new grids, collecting feedback from the frontline staff on how it is working on a daily basis. The group is taking this feedback and other data collected on overrides to the grid to determine what adjustments should be made. Our goal with the new grid is to make sure that our allotted time for the various scans matches with the demand.

Have a good weekend,

The SOP Team
