

June 26, 2015

Hello Everyone:

Our final mapping session wrapped up this week with the surgical Inpatients Standard unit. This was the largest group that we mapped throughout our sessions and at times that posed a challenge because of the diverse opinions within the group. In the end the group was able to develop a common future state for the admission and discharge processes.

With the addition of Natasha Sheeler from KM&T to our ranks this week, we are at full strength within our group. Natasha has a clinical background and that, with her process improvement experience, will give us a welcome perspective as we move into this wave of projects.

In a final note this week, we welcome Lisa Gretkzy our Windsor West MPP to our huddle this week as this Friday is 'bring your MPP to work' day. Lisa will be visiting some of the units at the Ouellette campus to see first hand the great work being done prior to joining us at the 1100 huddle.

Have a great weekend !!

The SOP Team
