Electronic Care Round Boards coming around to Mental Health

Rounds are not new to Mental Health, having conducted multidisciplinary rounds for some time now. However, this week the Mental Health team has implemented the standardized electronic Care Rounds Boards on 3 North and 3 South. The team has worked very hard over the past few months creating a Care Round Board that would capture the information required to support their patients on a daily basis.

Luke Di Paolo, Operations Manager Mental Health shares “despite the learning curve, I think that the new Care Rounds are efficient and will further improve patient care and communication among the multidisciplinary staff. Staff have echoed similar responses. I think this is a significant step in the right direction!”

Have a great weekend!

3 North trialed the new processing, making slight revisions along the way. On the first day, the team’s patience was tested as rounds took over 2 and a half hours. By Thursday the team proudly completed the rounds in 1 hour. What an accomplishment!
