

CRITERIA # 22 Distance Route to United States Border Crossing
Weight: 1

Assessment Definition: Patient transfers occur at various border crossings. Routes and travel times need to ensure ease of access.

Scale Factors: The distance to the nearest border crossing

- "10": within 5 km of the border
- "7": within 6-10 km of the border
- "5": within 11-15 km of the border
- "3": within 16-20 km of the border
- "1": greater than 20 km of the border

	Vendor Response	Stanlec Response	Notes	Scale
Site A	The Site is 15 kilometers or 18 min. from the Bridge and 14.6 kilometers or 23 min. from the Tunnel. The routes to both the bridge and the tunnel provide quick access to either the Bridge or Tunnel from this Site.			
Site B	The Site is 16.6 km from the Windsor-Detroit border crossing.			
Site C	Tunnel - 12 KM, Ambassador Bridge - 14 KM, Proposed Bridge - 14 KM			
Site D	While a high-speed route will soon be completed along the Queens Highway # 3, it is about 27 kilometres to the Ambassador Bridge by road.			
Site E	The subject site is within 12-15 km of the Windsor/Detroit bridge and tunnel. 22 (a) Subject Site to Ambassador Bridge - 11.37 km (14 Minutes) 22 (b) Subject Site to Windsor-Detroit Tunnel - 10.81 km (13 Minutes) This response is applicable to all three (3) parcels of land that form the subject site.			
Site F	Distance from Site to: -Ambassador Bridge: 22 km, or 19 minute drive Detroit Windsor Tunnel=19km or 20 minute drive Please see Tab "17"-Distances to Border Crossings			
Site G				
Site H	The subject site is within 11-15 km of the Windsor/Detroit tunnel and bridge. 22.1 Distance from the subject site to the Ambassador Bridge is 9 km (7 min). 22.2 Distance from the subject site to the Windsor-Detroit Tunnel is 14 km (12 min). 22.3 The subject site is highly connected to the USA/Canada border with only 14-15 minute travel time. 22.4 The short distance will allow for collaboration and the ability to reinforce and build on the USA/Canada hospital connections. 22.5 As a regional hospital, Windsor Regional Hospital will be able to provide a unique opportunity to both USA and Canadian patients with physical and new state of the art technological connects. 22.6 Through partnering and collaborating with the close Michigan hospitals, the new regional Windsor hospital will be cost effective and provide for efficiency by not duplicating specialized services while allowing for access to these specialized services. The subject site is centrally located and within 11-15 km of the USA border.			
Site I	The distance to the Ambassador Bridge to Detroit Michigan is 27 kilometres			
Site J	The distance to the Ambassador Bridge to Detroit Michigan is 27 kilometres			
Site K	The proximity of the Subject Site to the U.S. border is highlighted in Figure 9 (attached). The Subject Site is approximately 4.2km from the entrance to the Detroit-Windsor Tunnel; approximately 7.0km from the entrance to the Ambassador Bridge; and approximately 12km from the entrance to the New International Trade Crossing bridge (proposed). It should be noted that the distances provided herein are driving distances along arterial roads.			
Site M	The distance from the proposed site to the Detroit-Windsor Tunnel is 15.3km. In addition, the site is located 18.2km from the Ambassador Bridge crossing. Routes to both crossings are displayed in <u>Appendix 22-1</u> .			
Site N	13 km by road to the Detroit Windsor Tunnel. 2.5 km by road to Windsor Airport.
